New Web Sections Debut at neuroskills.com

Neuroplasticity, Ask the Expert Advance Knowledge of Brain Injury

Bakersfield, CA (May 15, 2017) – Centre for Neuro Skills (CNS) has developed two new sections of its website at neuroskills.com, which provide an array of vital information about brain injury, related neurological conditions, and postacute rehabilitation.

The sections, titled Neuroplasticity and Ask the Expert, are authored by CNS Senior Neuroscientist and Research Coordinator Dr. Lisa Kreber. Dr. Kreber is an esteemed professional known in the brain injury field for her publications, presentations at conferences, and contributions to improving patient outcome.

“These new pages emphasize CNS’ focus on educating patients, families, caregivers, insurers and those interested in brain injury,” Dr. Kreber said.

Dr. Kreber is an expert on neuroplasticity and this section includes a diverse range of subjects, from Mechanisms of Plasticity to Learning, Injury and Recovery.

Ask the Expert is an opportunity to send questions about brain injury and its related conditions to Dr. Kreber. The section covers Aphasia, Behavior, Concussion, Vision, and more. Visitors’ questions and Dr. Kreber’s responses are posted on the site.

If visitors need an answer not listed, a contact email is provided and Dr. Kreber will respond directly. Questions and answers are then added to the body of knowledge on the page, so future visitors may reap the benefits.

To learn more, visit Neuroplasticity [here](#) and Ask the Expert [here](#).

About Centre for Neuro Skills

CNS is recognized as an experienced and respected world leader in providing intensive rehabilitation and medical programs for individuals recovering from all types of brain injury. CNS effectively covers a full spectrum of care from inpatient and assisted living to outpatient/day treatment.
