**Centre for Neuro Skills CEO is Keynote Speaker
For Nurse Lifecare Planners' Conference in Hawaii**

(Bakersfield, CA) April 1, 2015 – Dr. Mark J. Ashley, founder, president and CEO of Centre for Neuro Skills (CNS), will be the keynote speaker at the Executive Forum Conference of Nurse Lifecare Planners, May 1-3, 2015 in Honolulu, HI.

Dr. Ashley's presentation, "Evaluation for Admission, Steps in the Continuum of Care, and Outcomes of a Postacute Brain Injury Residential Program," will cover key aspects of patient evaluation, transition to a postacute residential program, medical and disability guidelines, cost benefit calculations, and distinguishing between different levels of continuum of care for patients.

To illustrate the effect and outcome of comprehensive brain injury treatment, a former CNS patient and her husband will speak about their family journey of recovery, and the benefit of quality inpatient care.

Dr. Theresa Wang and her husband, David Chen, will discuss Dr. Wang's near-fatal head-on car crash in Kona, HI, in 2011. The highly publicized accident garnered worldwide attention. Dr. Wang spent several months at CNS' Bakersfield facility, where she regained vital cognitive skills and learned to walk, talk, and function again. Since then, her rehabilitation has been an inspiration to brain injury survivors, their families, and clinicians.

Comprehensive treatment for brain injured people is crucial, and Dr. Ashley's presentation covers key aspects that nurse lifecare planners must consider when recommending a program for clients. His 35 years of expertise in the field will help to educate conference attendees on aspects of neurobehavior, medication, therapy, and healthcare costs.

The conference will be held at the Double Tree by Hilton Alana Waikiki Hotel. Dr. Ashley's presentation is set for May 2, 1:30 – 3:30 p.m. in the Pikake Room.
