Centre for Neuro Skills Awarded Contract To Provide Care for Brain Injured Veterans

(Bakersfield, CA) April 1, 2015 – Effective today, the U.S. Department of Veterans Affairs (VA) awarded a contract to Centre for Neuro Skills (CNS) to provide comprehensive residential rehabilitation services to veterans who have suffered traumatic brain injuries.

“We are honored to help the brave men and women of the military who served their country with the utmost dedication,” said Dr. Mark J. Ashley, founder, president and CEO of CNS.

The contract is part of the Assisted Living Pilot Program for Veterans with Traumatic Brain Injury (AL-TBI). This program offers intensive rehabilitative care to eligible veterans with moderate to severe brain injuries. Treatment provided through AL-TBI is designed to meet veterans’ individual needs as well as to facilitate the transition to independent living. The program operates nationwide utilizing contracts with private providers.

At CNS, veterans will participate in cognitive, physical, occupational and speech therapies in an environment that fosters independence, skill-building, and community reintegration.

CNS’ counseling program also offers rehabilitation for many issues that veterans face, such as Post Traumatic Stress Disorder, drug and alcohol abuse, and the return to home and work responsibilities.

“Support for veterans and their families is crucial,” Dr. Ashley said. “We create a tailored plan for each veteran and help them achieve defined goals.”

All CNS clinical facilities – located in Bakersfield, CA; Dallas; Los Angeles and San Francisco - are included in the AL-TBI contract.
